To My Friend

JAMES BROOKS COMINS, M.D.

In appreciation of the watchful care which restored me to health, in the year 1914, making possible the carrying on and completion of the work, on this book.

PREFACE

WHEN, about the year 1900, I began work upon a dictionary of synonyms I planned to make what would be essentially a thorough revision and enlargement of a previously existing work on the subject. But after a short while I was convinced that such a method would result in a book with which I should only be dissatisfied. I then decided to make a complete original dictionary of synonyms, laying the emphasis upon words of literary and technical value, but omitting phrases the inclusion of which would swell the book to unreasonable proportions.

With this end in view I began the study of the definitions and quotations given in the *Oxford English Dictionary* (easily the greatest dictionary in any language), thinking I should be able to complete my book in four or five years at the most. It soon became plain, however, that the task could not be completed in this length of time, for before I had finished even the examination of the 15,000 pages of the *Oxford English Dictionary* more than five years had elapsed. But during that time I had made about 300,000 memoranda of words. Since the vocabularies of the more important special dictionaries—of dialect, of law, medicine, seamanship, engineering, etc.—are covered in the Oxford work, my notes represent a winnowing of virtually the whole fund of recorded English diction.

The collation and application of these 300,000 memoranda have taken me many years of intense labor: but these memoranda form the basis upon which the present dictionary has been constructed.

My aim has been to make the scope of the book as broad as possible in order to meet the requirements of my most critical advisers, though this has not been easy. Some have urged that obsolete and rare words be omitted; others have advised that they be retained. Some have thought the contextual notes superfluous; others, even among professional writers, have considered them highly valuable. And so with other features of the book. What some have thought needless, others have thought helpful. As a result it has seemed advisable to meet all reasonable requirements by including those features which serve any widely felt need.

The surpassing number of words I have had to work upon has made it easier to carry out a sound and helpful conception of synonymy—badly lacking in some manuals of this kind. The fullness of reference to antonyms, and the parenthetical comments that for many thousand words note their special status or special limitations upon their use will make a new appeal to discriminating writers.

PREFACE

To the mechanical features of the work I have paid special attention. I have endeavored, by means of a thorough system of cross references, to avoid the many repetitions which frequently occur in other dictionaries of synonyms. Furthermore, I have gone over the proofs many times to detect errors and omissions, which easily occur in a work so extensive, so complex, and so essentially new in its form of presentation; and I therefore believe the first edition of this book to be as correct as it is humanly possible to make it. But if any error or omission be discovered I shall esteem it a favor if the reader will but apprise the publishers, so that corrections may be made in subsequent editions.

This new presentation of the subject has been by no means the result of sudden inspiration. On the contrary, it has been the result of long years of unceasing study and experiment. If, therefore, I have afforded material help in the study of the meaning of words and in the correct use of English—the most resourceful of all languages—I shall not have labored in vain.

I wish hereby to acknowledge my indebtedness to those who have followed my work with suggestions and criticisms, and especially to Dr. Frederick W. Kilbourne of Meriden, Connecticut, for reading the last one hundred galley proofs and to Prof. Alfred D. Sheffield of Cambridge, Massachusetts, for seeing through the press the last two hundred pages of proofs.

F. STURGES ALLEN.

SPRINGFIELD, MASS., *August, 1920.*

NOTES OF EXPLANATION

affected.—When a person deliberately uses a diction which is not natural and is not chosen simply in order best to convey his meaning, his use of words is *affected*. This is ordinarily due to prudery, excessive niceness or fastidiousness, undue desire for show, or a desire to support some pretense, as of sympathy, refinement, etc. There are in English various words which are typically so used in some senses, and they are followed in this book by the word “*affected*,” as where *delectation* is used for *delight*, *peregrinator* for *pilgrim*, *confect* for *make*, *emporium* for *market*, *limb* for *leg*, *avaunt* for *away*, etc.

Common forms of affectation are the excessive use of euphemisms (see **EUPHEMISTIC**, below) and intensives.

archaic.—Words that belong to the past but have now fallen into disuse in ordinary language, but are for some reason retained in particular uses, as in poetry or for their flavor of archaism, are followed by the term *archaic*. Archaic uses may survive with particular individuals, as when the word *positive* is pronounced with the *i* before the *v* long (as in *pine*), or the word *oblige* is pronounced with the *i* sounded as *ee*. Among the very many words archaically used in English are: *ghastful* for *alarming*, *anhungered* for *hungry*, *bestow* for *apply*, *host* for *army*, *facete* for *facetious*, *hostel* for *inn*, *inform* for *deformed*, etc.

A word may become obsolete or archaic in general use, but be retained in professional use or in some stock phrase, as *let* in “*without let or hindrance*,” *hearse* or *herse* for *bier* in certain ecclesiastical usage. Archaic uses often shade almost insensibly into those that are *poetic*, *learned*, or *rare*.

bookish.—Some words are literary in that they are little used out of books, but still lack any special literary associations aside from the fact that they are rather more formal than ordinary words or that they “smell of the shop.” Terms decidedly of this character are often termed *bookish* (and are so marked in this book), as *horrific* for *horrible* or *frightful*, *tintinnabulum* for *bell*, *verve* for *ardor*, *horrific* for *fearful*. The use of such words often smacks of preciousness or stiltedness. Of course here, as in all matters of usage, there is no definite line of distinction setting off *bookish* words as a group from those usually felt to be *literary*, *learned*, *technical*, or *pedantic*. Cf. **TECH.**, below.

colloq.—Those words are designated as *colloq.* (that is, *colloquial*) which are usually and properly common in ordinary speech or conversation,

NOTES OF EXPLANATION

but lack the dignity of association which is necessary to make them appropriate for formal or elevated discourse.

The use of these words in ordinary conversation is not suggestive of vulgarity, but when used in formal or elevated discourse they lend an air of flippancy or illiteracy that is offensive to good taste. Words which have not become recognized as in good usage even to the extent of being colloquial are designated as *slang* (which see, below). The appropriate use of colloquial words lends a charm and easiness to informal conversation without which it is likely to appear affected, stilted, or pedantic.

A few examples of colloquialisms are: *milksop* for *coward*, *flit* for *depart*, *cabby* for *cab driver*, *swing* for *liberty*, *ado* for *fuss*.

contextual.—As used in this book the word *contextual* is used for brevity in place of “*a contextual sense or usage.*” Very many words depend more or less upon their context or the circumstances of their use for a part of the sense or meaning which they are intended to convey. Thus, when the question is asked, “Have you done your arithmetic?”, we must know the facts with reference to which the question was asked in order to know what *done* implies, as *learned*, *memorized*, or *worked the examples of*. This dependence of a word upon its context or the circumstances of its use exists, to a greater or less degree, in all cases where a word of more general meaning is used in place of a word of a narrower, or specific, meaning. Thus, whenever we use *do* in this way, we must in each case look beyond the word itself to know the particular implication which it is intended to have.

An almost unlimited number of contextual synonyms might in this way be given in any dictionary of synonyms, as for example *animal* under *horse*, *cow*, *child*, *man*, *woman*, *insect*, etc.; *emotion* under *passion*, *frenzy*, *love*, *hatred*, *joy*, *happiness*, etc.; *move* under *rush*, *go*, *dart*, *run*, *walk*, *creep*, *glide*, etc.

I have attempted to avoid uselessly cluttering the pages of the book with an excess of such synonyms, but have added general words as synonyms where it was felt that they would be of service to the user of the book.

Examples of the use of *contextual* occur on most of the pages, as after *ecclesiastic* under *monk*, *girl* under *hussy*, *product* under *offspring*, *mark* under *brand*, etc.

euphemistic.—One often has occasion to express what is in itself unpleasant or is conventionally tabooed in direct expression, by using terms that have less offensive suggestions than would be involved in those precisely or bluntly indicating one's meaning.

The use of euphemisms is a notable feature of primitive races or customs, as where the Greeks designated the avenging *Errinnyes* by the name *Eumenides* (a name which arose as a euphemism, and literally means, “the gracious ones”), or where we use *intoxicated* for *drunk* or

NOTES OF EXPLANATION

bowels or *intestines* for *guts* (a word once in polite usage and still proper in some connections). Other words wholly or often used euphemistically are *infidelity* for *adultery*, *intimacy* for *illicit amour*, *departure* for *death*, *innocent* for *simpleton*. So any word of pleasant connotation may be used in place of a word of unpleasant suggestion whenever the intended sense will be conveyed.

fig.—When the use of a word in the sense for which it is given involves a consciousness that it is more or less transferred or figurative in use, the word is followed by *fig.* (for *figurative*). This has resulted in many words being marked *fig.* which are not figurative in any sense that would imply that their use belongs to what is rhetorically called figurative, flowery, or ornate discourse; but merely that the sense though established in English usage is not one in which the consciousness of transferred or figurative use is yet entirely forgotten, and without the *fig.* there might be a momentary difficulty in sensing the connection. This is the case with *blaspheme* for *abuse*, *whip* for *abuse*, or *cosmic* for *consistent*, *voice* for *speaker*, *day* for *time*.

Proper names conventionally used as synonyms are also designated as *fig.*, where the consciousness of the figure still exists, as where *Boanerges* is used for *speaker*, *Castalia* or *Hippocrene* for *spring*, *Cyclopean* for *massive*.

formal.—I have designated by *formal* those words which are characteristic of formal or precise discourse, as where *insular* is used for *island* (as an adjective), *protasis* for *beginning*, *chamber* for *bedroom*. Here again it is difficult to draw the line between those sufficiently formal to be so designated and those which are not, and I have omitted the designation when there seemed to be any question about its correctness.

intensive.—When the intensive force of a word is a noticeable element of its meaning the designation *intensive* is added after the word. In many cases a prefix is added to a word so as to form a new word, but in an intensified degree. The commonest prefixes so used are *be-* and *en-* or *em-*, as in *bedeck*, *becloud*, *bespatter*, *embolden*, *empoison*, *enchain*; but *en-* and *em-* are now little used in new combinations, and *be-* usually has a suggestion of excess, often with a note of contempt or disgust, as in *bedeck*, *begem*, *becalm*, *bespatter*, *bedraggle*. The intensive force is plainly felt in some of the older words, now obsolete or archaic, as in *beshrew* (thee), *bethink* (thee), and in many modern forms, such as *bedew*, *enfeeble*, *empoison*, *enchase*, *encarnalize*, etc. In many cases the intensive force of the prefix *em-* or *en-* is lost and the compound word has become the ordinary term, as *embitter* (rather than *bitter*), *encircle* (rather than *circle*), *emboss* (rather than *boss*). The emphatic form is in some cases so far restricted to poetic use as to justify the denomination *poetic*.

learned.—Many words are common enough in learned discourse, written

NOTES OF EXPLANATION

or spoken, but are nevertheless quite out of place in ordinary general literature or conversation. Technical terms (here marked as *tech.*) are essentially of the learned class; but many other words which cannot properly be classed as technical and yet are not generally known to those of ordinary education, are in this work followed by the word "*learned*." It would be ridiculous to designate as *learned* all words not understood or which are not at all, or but imperfectly, understood by those with only a grammar-school or even a high-school education, for of these words, many will be more or less familiar to one person and strange to another, who in turn may know well words unfamiliar or unknown to the first. Words of this class are *lugubrious, dolorous, matutinal, venial, fallacious, inimical*, and these are left unmarked, though at times it is difficult to draw the line between them and those marked *affected, learned, or literary*.

Those words designated as *learned*, therefore, are only those about which there seems to be no question and concerning the nature of which a warning should be given to the user of this dictionary. Among them are: *indite* for *compose*, *mordacious* for *biting*, *decollate* for *behead*, *autochthonous* for *native*. Learned words are often, like technical terms, more exact in their meanings than more common words.

literary.—Many words are chiefly restricted in use to literary expression notable for its elevation in form or taste or to formal addresses couched in such language, and these are designated as *literary*. Such words carry a suggestion of studied elegance of expression or of learning that would lend to their use in colloquial or technical discourse an appearance of pedantry, stiltedness, or affectation.

Many or most of these words have once belonged to ordinary diction, but have by a long restricted use been set aside for this more studied or elegant discourse, as *burgeon* for *bud*, *distract* for *absent-minded*. The setting apart of words in this way is a process continually going on in English. Further common examples of "*literary*" words are *froward* for *perverse*, *fruition* for *enjoyment*, *imbrue* for *stain*, *impugn* for *attack*, *Thespian* for *dramatic*, *array* for *dress*, *decease* for *die*, *fuliginous* for *smoky*, *infelicitous* for *unhappy*. Cf. FORMAL, above.

obs.—The abbreviation *obs.* (for *obsolete*) is put after such words as have fallen into disuse but have seemed notable enough to warrant their inclusion among the synonyms. Since Chaucer's time many thousands of English words have become obsolete, and the presence of even a large part of them would mar a book of English synonyms of to-day. The art of printing has now, as it were, stereotyped our English vocabulary, so that in these days words comparatively seldom become obsolete. Indeed, there is at present rather a tendency, consciously or unconsciously, to retain or revive words already partly or wholly fallen into disuse, as is seen in the large number of words marked *archaic*.

NOTES OF EXPLANATION

Therefore, where there has seemed to be some literary or other sufficient reason for including in the book an obsolete word, I have not hesitated to do so, as in case of *pleat* for *braid*, *pleasant* for *buffoon*, *wick* for *village*.

obsolescent.—Where a word has begun to fall into disuse, but still has use enough so that it would be inappropriate to designate it as *rare* or *obsolete*, I have added the designation *obsolescent*. As already said, words do not now so often become obsolete, the influence of the printing-press being to keep in use the vocabulary which we already have. Words that are simply falling into disuse and so are *obsolescent* (as *incommodious* for *inconvenient*, *quiz* for *hoax*) are to be distinguished from *archaic* words which are consciously retained in use or revived for the sake of the flavor of archaism associated with them. Cf. **ARCHAIC**, above.

rare.—The term *rare* after a word denotes that the word is rarely used in general literature. Rare words consist mostly of those which now and then appear in literature but have never become common. Thus, *fledgy* for *feathery*, *affright* for *fear*, *desipient* for *foolish* were first used many years ago, but they have never become established in general use. Some words now *rare* were once common; where the fact of their former frequent occurrence is of notable interest these are usually designated as *now rare*. Rare words ordinarily are of a more or less learned or pedantic character, and hence their use is often affected to produce a humorous or ironical effect.

rhetorical.—The word *rhetorical* is used to designate words which are characteristically used in language that is artificially or extravagantly elegant, or that specially seeks to convey an extreme or exaggerated effect, as where *mighty* is used for *big*, or *mellifluous* for *melodious*, or *wroth* for *angry*.

slang.—When a word as a whole, or in the given sense, has a certain arbitrary use, but is considered as generally below the level of educated speech, it is designated as *slang*.

Slang generally consists of new words or new uses of old words; but this is not necessarily so. Mere newness does not make a word or sense *slang*, for many of the new words and senses of words in all departments of life, especially in the arts and sciences, are not slang in this sense, though they might come under the very broad sense of slang as equivalent to *jargon*, or technical terminology (cf. **TECH.**, below). Generally speaking, the use of slang is not only inconsistent with a refined or elegant diction, but also with that seriousness and dignity which is felt to be essential to the general course of conduct and speech.

Occasionally, terms which arise as slang, such as *hoax*, *jitney*, and *bus*, are accepted into good *usage*, but the great bulk of slang words (such as *newlywed* for *benedict*, *dope* for *medicine*, *claret* for *blood*,

NOTES OF EXPLANATION

buster for *blusterer* or a *big thing*) remain slang as long as they are used.

spec.—The word *specific* (abbreviated in the text to *spec.*) denotes that a word is a synonym of the title word only in having a specific, or particular and restricted, sense which is included among those for which the title word may be used. Specific senses are at the opposite extreme from words which have such a general meaning that they are denominated *contextual* (which see, above).

It is noteworthy that the more exact a person becomes in his designation or description, the more specific are the words which he uses. Such words when correctly used conduce to accuracy, but they correspondingly narrow, often belittle, the meaning.

The designation *spec.*, therefore, often serves as a useful or needed warning that a word given as a synonym is so much restricted in its meaning that it is not to be used as a general equivalent of the other; in many other cases this is obvious without the *spec.*, which is then given merely for the sake of uniformity. For examples consult entries on almost any page at random, as *depart*, *horse*, *perceive*, *shrine*, *child*, *offspring*.

tech.—The abbreviation *tech.* (for *technical*) is added after words such as *pomiform* for *apple-shaped*, *ramus* for *branch*, *squama* for *scale*, *sternum* for *breastbone*, which are chiefly found in, and characteristic of, technical usage. Many, perhaps most, of such words are occasionally to be found outside of technical literature, but their use then nearly always gives an impression of learning or pedantry. Many technical terms are the mere jargon, or slang (in the broad sense), of a trade or profession, and such terms are not ordinarily included in this book.

It is to be noted that technical, as well as learned, terms are ordinarily more specific and exact in meaning than popular words, and are also barren of much or all of the connotations which lend to the commoner words their richness of meaning.

 Various characterizations of words other than those given above are used in this book, such as *British*, *U. S.*, *hist.* (for *historical*), *antiq.* (for *antiquarian* or *antiquities*), *stilted*, etc. Such designations have meanings readily inferred from their ordinary significations, and there is nothing in their relation to general usage or to each other to call for explanation of them here. Thus, the designation *British* is equivalent to "only or distinctively in British usage"; *U. S.*, to "only or distinctively in use in the United States"; *hist.*, to "used in historical reference or discourse"; *antiq.*, to "used by antiquarians or in reference to antiquities"; *stilted*, to "characteristically used in stilted discourse."

CROSS REFERENCES

Every cross reference from a word is to some other synonymous word, under which it is given either merely as a synonym or by way of a reciprocal reference at the end. This latter is often done where there are two groups of synonyms of overlapping signification.

The matter in smaller type at the foot of the page consists entirely of cross references, the words in the *italic type* in each case having, under the main vocabulary entrance, a list of synonyms including the word referred from. Thus, "**obloquy**: *abuse, discredit*" means: "see in the main Vocabulary the words *abuse* and *discredit*, where the word *obloquy* will be found as one of the several synonyms of the other words."

DIVIDING NUMBERS

Under many of the vocabulary entries the synonyms are divided into numbered groups, so as to keep together the synonyms for any one sense, because the synonyms of a word in one sense usually differ in whole or in part from the synonyms of the word in a different sense. Where the distinction between the senses is not obvious, I have introduced a brief hint or definition so as to make this plain, as under *abridgment*, *arrangement*, *ask*, v. t., *assembly*, *base*, n., *beak*. Frequently the difference in meaning between the senses is made clear or more obvious by the following antonyms, as under *absolute*, *ask*, v. t., *branch*, *body*, *benefit*.
